

Schwartz Shining Star: Farhana Nargis Schwartz Round Administrator

Without Farhana Schwartz Rounds would not happen in our Trust.

Without Farhana we wouldn't have won Best Innovation award last year (after all she made the film!)

Farhana is the "lynch pin", she has designed stickers which encourage conversation inviting people to ask about the round, after the round

She emails invitations to everyone who has attended previous rounds, designs posters encouraging people to come, orders food, sets up the room and puts it back down again, collates data for the Point of Care Foundation, has helped the Point of Care Foundation by participating in training films. She organises her holiday around Rounds with such amazing planning everything is covered and all goes smoothly

She arranges the pre-meets, helps find panellists, comes up with amazing titles for our rounds, supports us after tough rounds, is hugely encouraging to the facilitators and is always cheerful, upbeat and positive.

And she does this without any fuss, wanting to remain in the background and refuses to take any credit for her input protesting that it is a 'whole team collaboration'

She may think that but the rest of us know that she is our Shining Star and we would be lost without her!

Nominated by Harriet Barker, Dr Peter Wilkinson and the whole Schwartz Round Steering Group at Ashford and St Peter's Hospitals NHS Foundation Trust
